Harbour Lounge Chair

Already available in multiple iterations—from a comfortable dining chair to a sophisticated swivel-base chair—the Harbour series gains a new member: the Harbour Lounge Chair. A sculptural piece with a minimalist expression, the solid yet light weight construction retains all the hallmarks of its predecessors, while adding laid-back comfort to the series. Set on a solid wood frame, the upholstered shell with gently curved sides and an angled backrest retains the sense of being cradled and supported, while inviting complete relaxation.

Bridging the gap between an armchair and a lounger, the new Harbour Lounge Chair has the same minimalist expression as its predecessors. Resting on a solid wood frame, offered in natural, dark stained or black oak and walnut, its embracing shell is upholstered in a range of tactile yet durable fabrics in contemporary colourways. The low-pitched frame features rounded legs and subtle joinery details, and the generous shell has a wide back, angled for comfort and supporting the body while providing space to relax. Ideal for relaxing into after a long day, it features the series' characteristic curving armrests and a luxuriously oversized seat complete with a corresponding cushion.

About the Designer

Founded in Copenhagen in 2008 by Jonas Bjerre-Poulsen and Kasper Rønn, Norm Architects specialises in residential architecture, commercial interiors, industrial design, photography and art direction. The company name highlights the importance of drawing inspiration from norms and traditions within architecture and design—in particular the Scandinavian design principles of timeless aesthetics and natural materials, and the Modernist values of restraint and refinement. Together with MENU, Norm Architects create design that unites great materials and craftsmanship, while embodying beauty, tradition and timeless simplicity.
