# Pact with the moon

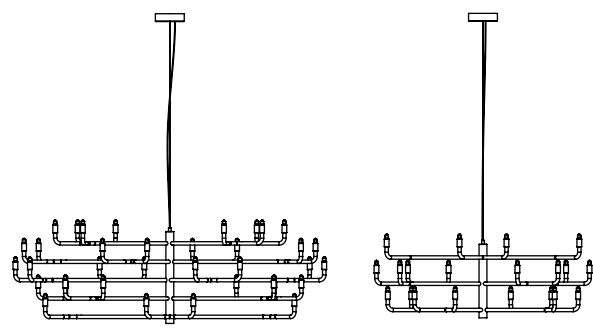

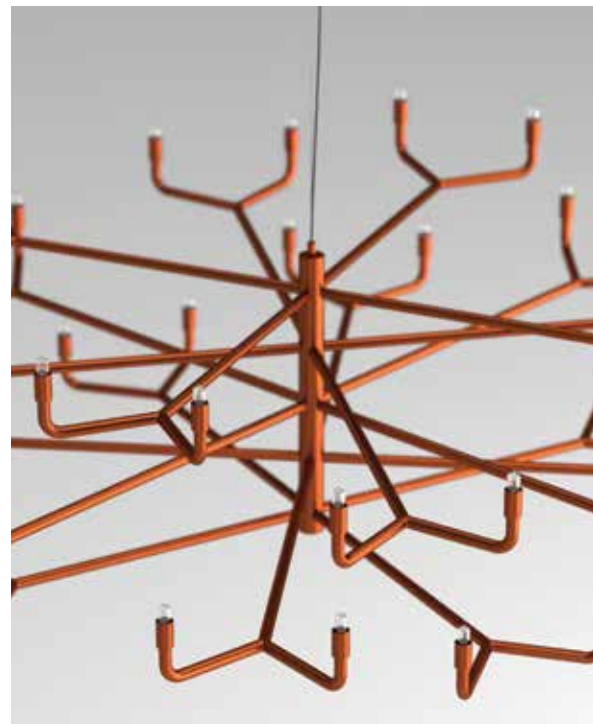

At night, AXIS71, has only one real competitor. Our bright shining moon. We will not lighten our lamps while she wraps our earth with her smooth light. All other nights it's up to you to enjoy the warm, tender light of the AXIS71 masterpieces. Another aspect of the pact is that we shall turn off all lights which we don't need for saving energy. Only this way we show respect for natural sources like earth and moon.

**MASTER EDITIONS**

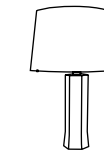

DESIGN  
**ATELIER ANTOINE CALLEBAUT**

The 'Callebaut atelier' was founded by Antoine Callebaut after the death of Jules Wabbes in 1978. Antoine Callebaut collaborated with Jules Wabbes, for many years. He was called the 'Man of steel', like Guillaume Van Achter was called the 'Man of wood'. When Jules Wabbes died, Antoine Callebaut wanted to create his own business. At the moment he died, Viviane and Andre Vossen bought the 'Atelier Antoine Callebaut'. Later, it would be integrated in Axis Seventy-One. The architect André Jacqmain as well as the interior architect/designer Jan Vlug, (and garden architect Jacques Wirtz (which many of his gardens are lighted by the 'Borne' model) worked together with, 'Atelier Antoine Callebaut'.
