

2018-2019

cc-tapis®

cc-tapis was created in 2011 by the traditional Persian house Maison Chamszadeh, founded in 1943 and well known in France for the quality of its handknotted rugs. The main headquarters are now in Milan, where a team of designers innovate through a new approach to traditional methods. Undyed raw materials, innovative weaving patterns and techniques are key parts of the process.

chapter 2 behind cc-tapis

**cc-tapis rugs
are completely
hand-knotted
by expert tibetan
artisans in nepal.**

production

All cc-tapis rugs are handknotted, that means every knot has been made by hand, which is quite a task if you can imagine that a cc-tapis rug can have up to 232.000 tibetan knots per square meter. No machines are ever used in the entire process and all rugs are produced the way they were produced a century ago.

Far from mass production, cc-tapis aims to offer a tailored service to those who understand and enjoy a high-end product, where a 3 month production time contains a story of ageless culture.

A strong respect for the materials and for the culture of this ancient craft is reflected in the company's eco-friendly approach to every step of production, ranging from the hand-spinning of the softest Himalayan wool to the use of purified rainwater for the washing of the final products, making each one of cc-tapis rugs unique.

materials

Himalayan wool

Himalayan wool comes from Tibetan Highland sheep, a robust and durable wool which is rich in natural lanolin. Lanolin gives the wool its strength and protects the sheep from the harsh weather in the Himalayas making the rugs naturally stain resistant. When dyed Himalayan wool maintains an incredible depth to the color never becoming flat.

Pure silk

cc-tapis uses pure silk, made by the silk worm, which is imported directly from China. Extremely fine with a beautiful and natural shine.

Bamboo silk

A fibre created from bamboo cellulose. It is a natural and sustainable material with a thick and smooth texture. It has a beautiful shine very similar to pure silk. We recommend it for projects where clients would like full silky rugs with a thick, lustrous and high-pile.

Linen

Linen is a natural material made from fibers of the flax plant. It is a rich and thick material which has a beautiful and subtle shine.

Aloe

Aloe is a local nepali word for a type of nettle plant which grows abundantly in Nepal.

A material that once it has been hand-carded and hand-spun is strong and extremely durable.

It has a harder texture than wool and due to this hardness we recommend it for contract applications or high-traffic areas such as shops or hotels. It sheds much less than wool

and can be fully dyed with the exception of light cold colors.

bespoke

Producing our rugs exclusively by hand means that we are able to customize every rug. We can adapt the dimensions, give many of our models new colors, or work with you on a completely new design. There are endless possibilities to create a unique carpet using more than 1200 different colors and materials like wool, silk, linen or aloe, which can be combined to create different textures and varying pile heights. Between 8 and 24 weeks may be needed to produce our handknotted rugs, depending on the size, the knot-count and the complexity of the design. Upon request we may also produce a sample of the desired carpet.
