

# Dornbracht Kitchen

The new glazed  
steel kitchen sinks –  
made by Alape

Culturing Life

# The next generation of kitchen sinks

More choice, more freedom to combine, more individuality: the new kitchen sinks from Dornbracht combine customary excellent design with an extended choice of colours and the exceptional material properties of glazed steel. They thereby set standards with regard to aesthetics, robustness and ease of care.

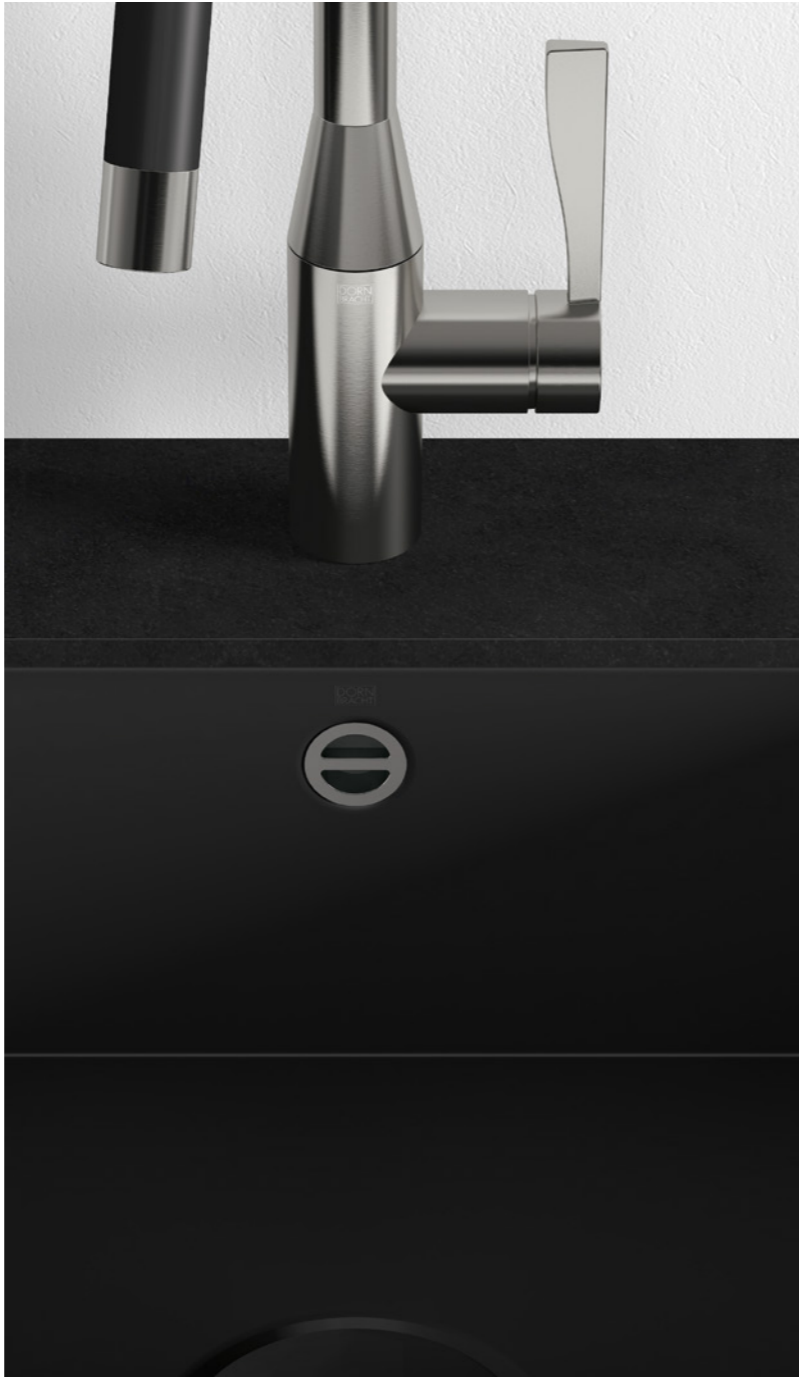

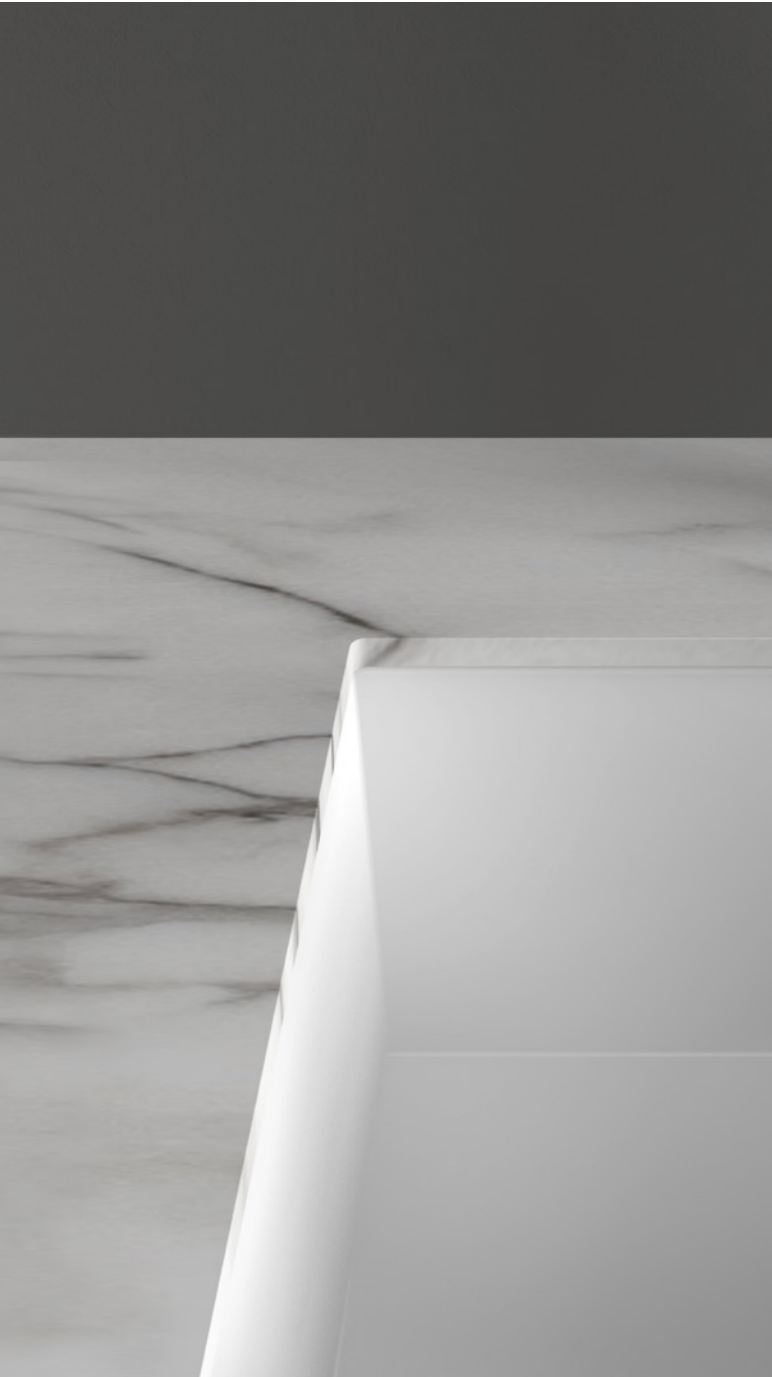

# Individual design options

Thanks to three colour variations – black, white and sand – the new Dornbracht kitchen sinks can be stylishly combined with any worktop. The range of surfaces provides additional freedom of choice: the three colour variations are each available in matt or high-gloss.

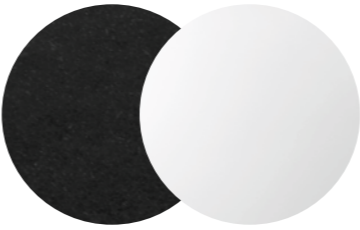

This way, both individual as well as wide-ranging colour concepts can be achieved:

# Design quality – down to the last detail

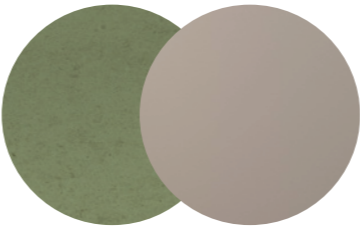

Like all Dornbracht products, the new kitchen sinks impress due to their top level of design and production quality. This is expressed in clear lines, harmonious proportions, exact contours and precision craftsmanship. The elegant design is highlighted by details such as the colour-coordinated pop-up waste.

**HARMONIOUS** The worktop and kitchen sink are the same colour tone and thus seamlessly merge to form a single surface.

**CONTRASTED** A white kitchen sink with a black worktop – or vice versa – produces a distinctive emphasis.

**COMPLEMENTARY** Coloured materials such as natural stone or marble are harmoniously complemented with a sand-coloured kitchen sink.

# Glazed steel – a unique material

The exceptional precision in design is made possible by the use of glazed steel. The material combines the manufacturing qualities of stainless steel with the high-quality look and feel of ceramic through its low material thickness and the specially developed steel glaze. Extremely robust and durable, glazed steel also has excellent hygienic properties, which render it perfect for use in the kitchen.

An overview of the benefits:

- resistant to impact, shock, scratches and abrasion
- easy to care for and antibacterial
- colour-fast
- resistant to UV, heat and cold
- acid and chemical resistant
- precise shapes and exact surfaces

## Product range

Single sink – under-mounted  
high-gloss sand

38400002-78 – 400 × 400 mm  
38450002-78 – 450 × 400 mm  
38500002-78 – 500 × 400 mm  
38550002-78 – 550 × 400 mm

Single sink – under-mounted  
matt sand

38400002-72 – 400 × 400 mm  
38450002-72 – 450 × 400 mm  
38500002-72 – 500 × 400 mm  
38550002-72 – 550 × 400 mm

Single sink – under-mounted  
high-gloss black

38400002-76 – 400 × 400 mm  
38450002-76 – 450 × 400 mm
